

Instructions

1. Use the large square and small hexagon pegboards for your project. If you're using a clear pegboard, slide the actual-size pattern underneath it. Place all the beads for the design.
2. Cover the completed design with the ironing paper. Keeping the iron level, gently iron the beads in a circular motion for about 10 seconds to fuse the beads evenly. Ironed properly, the beads will still have an open center.
3. Once the design is cool, peel off the ironing paper. Lift your design from the pegboard; flip the design over and repeat step #2. Your pegboards and ironing paper are reusable.

You will also need craft glue to complete your project.

ASSEMBLY

Glue the wave pieces to each other and to the boats as desired to create this boat racing scene.

You can paint a dimensional scene as we did and then glue the boats, waves, and buoy in place.

Blow the horn and start the race!
