ASSEMBLY

Put each butterfly together by pressing the wings onto the body.

To create a tail, thread a 6" piece of embroidery floss through the bottom single bead on the body and tie it in a knot.

You can create a hanger by threading another piece of floss through the top hole of the body. To make a plant pick, insert a piece of wire through the body.

Fusing Instructions—Only Adults Iron

1. Place your pegboard on a flat, heat-safe surface.

2. Set a household iron to the medium setting. Place ironing paper over the pegboard. In a circular motion, begin to iron the project. Do not press down with the iron. As the beads begin to fuse, you will see circles of the beads start to show through the paper. When ironed properly, the beads will still have an open center. Let the design cool.

3. Remove the paper and bead design from the peg board. Flip the design over to expose the non-fused side. Repeat step two. Let cool completely.

NOTE: Beads need heat for about 10-20 seconds per side to fuse evenly. Lift the paper occasionally to see how the beads are fusing. Depending on the size of the project, additional heating time may be required. DO NOT OVER-IRON the beads as it will make the centers of the beads close and can make any assembly you do with your project more challenging.
