Fusing Instructions—Only Adults Iron

1. Place your pegboard on a flat, heat-safe surface.
2. Set a household iron to the medium setting. Place ironing paper over the pegboard. In a circular motion, begin to iron the project. Do not press down with the iron. As the beads begin to fuse, you will see circles of the beads start to show through the paper. When ironed properly, the beads will still have an open center. Let the design cool.
3. Remove the paper and bead design from the peg board. Flip the design over to expose the non-fused side. Repeat step two. Let cool completely.

NOTE: Beads need heat for about 10-20 seconds per side to fuse evenly. Lift the paper occasionally to see how the beads are fusing. Depending on the size of the project, additional heating time may be required. **DO NOT OVER-IRON** the beads as it will make the centers of the beads close and can make any assembly you do with your project more challenging.

ASSEMBLY

Select a floss color for the hair. Thread the needle. (Note: if smaller children are making this project, an adult may want to do this step). Insert the needle through a bead on the top of the Dino's head. Cut the floss, leaving about 5" on each side. Repeat twice more.

If a pigtail hair style is desired, tie each side into a knot against the head.

For a single ponytail, knot both sides at the top of the head.

For multiple ponytails, do as above and repeat 3 more times in different beads down the back of the head.

Try braiding the hair, or trimming to different lengths to create your one-of-a-kind Dino Girl!
